Edit menu in Rule Set Manager

Use the menu items in the **Edit** menu to move rule sets around in groups.

Cut

Moves the selected rule sets to another group if you select **Paste** in another group.
If the group has a rule set with the same name, a number appears at the end of the name
of the pasted rule set. For example, **Refine Input** rule set becomes **Refine Input 1**.
Cut is available only for rule sets that are not enabled.

Copy

Duplicates the selected rule sets in another group if you select **Paste** in another group.
If the group has a rule set with the same name, a number appears at the end of the name
of the pasted rule set. For example, **Refine Input** rule set becomes **Refine Input 1**.

Paste

Adds one or more rule sets that were previously cut or copied.
If the group has a rule set with the same name, a number appears at the end of the name
of the pasted rule set. For example, **Refine Input** rule set becomes **Refine Input 1**.
