# Sample: Simple job workflow

Use the Simple Job Workflow sample rule set to create a chain of rule sets that automates many simple event/action activities in the workflow.

The Simple Job Workflow rule set is located at **Rule Set Library** > **Rule Sets** > **Sample Rule Sets**.

What the rule does

Sets up a series of triggers that start one or two simple actions in the Prinergy workflow. Each event/action rule operates in isolation.

Why it is useful

Automates routine, frequent, and simple activities in a job workflow.

Events and actions used

Events	Flow	Actions
Job Status Changed	Branch	Perform Final Output
Page Rejected	none	Delete Page
Surface Full	none	Perform Imposition Output
Page Approved	none	Perform Loose Page Output
Input File Added	none	Refine Input File, Set Page Approval

Tip: In Rule Builder, you can search for a specific event or action by clicking anywhere on the **Events**, **Flow**, or **Actions** tabs, and typing the name.

Where to enable it
This rule is suitable for enabling either in specific jobs or across the system.
