

# Sample: Send an e-mail message

Create a rule that sends an e-mail message when an event occurs.

## What the rule does

Notifies the customer service representative when an imposition proof is generated.

## Why it is useful

Automatically notifies stakeholders when specific events occur. It is also useful for testing rules.

## Events and actions used

Event	Actions
Imposition Output OK	Email

**Tip:** In Rule Builder, you can search for a specific event or action by clicking anywhere on the **Events**, **Flow**, or **Actions** tabs, and typing the name.

## Key parameters

Event or action	Parameter
Email	<p><b>To:</b> Type the stakeholder's e-mail address.</p> <p><b>Subject:</b> Type a message to appear on the subject line of the e-mail (for example, Imposition proof is ready).</p> <p><b>Body:</b> (optional) You can use HTML for the body content.</p> <p><b>Attachments:</b> You can use wild card characters in the file name—for example, use *.vps to attach all of the virtual proofing files in the job folder.</p> <p>To attach files in a specific directory, use the <b>Files</b> tab.</p> <p>To attach files that relate to the triggering event on the <b>Event Properties</b> tab, in <b>Home</b>, select <b>Path Name</b>.</p> <p>To attach the files generated by an output event on the <b>Event Properties</b> tab, in <b>Home</b>, select <b>Output Files</b>. For example, use this to attach Prinergy VPS files after the <b>Imposition Output OK</b> event.</p> <p>To attach PDF files after a refine event (such as <b>Page Refined OK</b>) on the <b>Event Properties</b> tab, in <b>Pages</b>, select <b>Files</b>.</p>

### **Where to enable it**

This rule is suitable for enabling in specific jobs or across the system.

### **Other considerations**

You must have RBA e-mail set up on the Prinergy primary server: select **Tools > Configure RBA**.
