

Submitting a job to Digimaster using Digital Submit

Test the configuration by submitting a digital print job using Prinergy Digital Submit.

1. Drag a PDF file that has a SmartBoard monochrome job ticket from your desktop or other location onto a digital press or automated production target. Alternatively, you can double-click a digital press or automated production target, and then add your PDF file. Or, to use the **File** menu, select a target, and select **File > New Job Submission**.
2. In the New Job Submission dialog box, enter information as required. A red asterisk indicates that you must make an entry.
3. Click the **Submit** button.

You can now view this job in Digital Direct, Workshop, or Dashboard.
