

# Hardware and software requirements

## Compatible Kodak production workflows

- Kodak Prinergy Workflow software 9.0 or later
- Kodak Prinergy Packaging Layout Automation 9.0

## Floating License Manager requirements

- Kodak Prinergy Workflow software 9.x or later

## System requirements

<b>Supported operating systems</b>	<ul style="list-style-type: none"><li>• macOS Mojave (10.14) - Oct 1, 2023 No longer supported</li><li>• macOS Catalina (10.15) - Oct 1, 2023 No longer supported</li><li>• macOS Big Sur (11.0)</li><li>• macOS Monterey (12.0)</li><li>• Microsoft Windows 8.1 Pro</li><li>• Microsoft Windows 10 Pro</li><li>• Microsoft Windows 11 Pro</li><li>• Microsoft Windows 2016</li><li>• Microsoft Windows 2019</li></ul> <p><b>Note:</b> Windows 10 IoT is not supported</p>
<b>Memory</b>	4 GB of RAM (available minimum)
<b>Hard disk space</b>	4 GB of available space
<b>Screen resolution</b>	1024 x 768
<b>Processor</b>	The M1 chipset is supported with Pandora 8.4.1 and later

## Pandora and Java

Pandora is Java-based software. The Java software can run on many different kinds of computers because it uses a “virtual machine”—a kind of translator that turns general Java instructions into commands tailored to the type of computer that you are using. For Apple Macintosh and Microsoft Windows OS-based computers, the virtual machine is Java Runtime Environment (JRE). The Pandora installer installs the virtual machine on your computer regardless of whether you already have a virtual machine. This automatic installation ensures that you have a compatible version of JRE.

## Pandora and Adobe software components

Pandora 9.04 uses version 18 of the Adobe PDF Library software to read, modify, and write PDF documents.
