# Prinergy Workflow variable marks

When using Pandora integrated with the Prinergy Workflow software, you can take advantage of Prinergy Workflow variable marks. You can place these variable marks anywhere on a substrate, and when you export the layout, Prinergy Workflow will replace the placeholder text string with variable text from the Prinergy Workflow job.

Prinergy Workflow variable marks are located in the folder `Pandoraversion\Extras\Prinergy Variable Marks`. For more information about specific Prinergy Workflow variable marks, see the *Prinergy Workflow Workshop User Guide*.
