

Creating a label mark using Adobe Illustrator

Create the label mark

This procedure summarizes the steps for creating a label mark. Use the help files for your version of Adobe Illustrator to confirm where in the user interface you can perform each step.

Create the mark	<p>In this example, create a mark with a variable that is replaced with the computer's system time:</p> <p>Create an insertion point on the artboard and then type: <code>Time: <Time></code></p> <p>Note: The text between the brackets is case-sensitive. It must be capitalized as shown.</p>
Set the kerning and tracking	<p>This step ensures that the text appears correctly in the final output:</p> <p>With all the text selected, find the Character palette and set the kerning and tracking values to 0.</p>
Set the page size	<p>This step ensures that the mark can accommodate the text that Pandora fills in for the variable:</p> <p>Find the Document Setup dialog box, select Artboard, and type the desired mark dimensions in the Width and Height boxes.</p>
Set the ruler origin point	<p>This step ensures that the mark outputs correctly on a Prinergy system:</p> <p>Reposition the text mark on the artboard so that it is flush with the left edge, select Show Rulers, and double-click the upper-left corner where the rulers intersect.</p>
Delete styles and colors from the job	<p>Remove all graphic styles, brushes, and symbols from the palette and delete all colors in the job other than White and Registration.</p> <ul style="list-style-type: none">• In the Swatches tab, select all the swatches except White and Registration, click the trash can, and confirm the deletion.• Repeat in the Graphic Styles, Brushes, and Symbols palettes.
Change the White swatch to Registration	<p>Double-click the white swatch, and, in the Swatch Name box, type <code>Registration</code>. Do not use the default Registration color swatch. Pandora does not interpret this as a registration color.</p> <p>In the Color Type box, select Spot Color.</p> <p>In the Color Mode area, in the C, M, Y, and K boxes, type 100.</p>
Change the text to Registration	<p>Select the Text tool, select the text you created (<code>Time: <Time></code>), and click the Registration swatch.</p>
