Service Description and Specifications:

The service environment consists of:

- An instance equivalent to the license of the subscribed user(s)
- A user gains access to the service environment through either the operation of a standard Web Browser, Mobile Version or depending on license - desktop application.
- You are solely responsible for ensuring that data stored is in compliance with all applicable laws or regulations.
- You are responsible for all damages and liabilities that result from data loss during transmission, storage, or retrieval.
