Managing rule sets in Rule set Manager

Set up a folder structure in the Rule Set Library to make storing and accessing your rule sets easier.

1. Open Rule Set Manager.
2. Manage rules sets in any of these ways:

To do this	Do this
Create a group	Right-click the group that will contain the new group, and select **New Group**. Type a name for the new group, and click **OK**. **Note:** The group name must be unique. You cannot have groups with the same name, even if they are at different folder levels.
Add a rule set to a group	Do either of the following steps: • Create a rule set and save it to the group. • Import a rule set into the group.
Copy a rule set	Right-click the rule set, and select **Copy**. Then right-click another group, and select **Paste**.
Move a rule set between groups	Do either of the following steps: • Select the rule set and drag it to the new group. • Right-click the rule set, and select **Cut**. Then right-click another group, and select **Paste**.
Rename a rule set or group	Right-click the rule set or group, and select **Rename**. **Tip:** Select the rule set or group, and press F2. **Note:** You cannot rename an enabled rule set.
Pause a rule set	Right-click an executing rule set or group, and select **Pause**.
Resume a rule set	Right-click a paused rule set or group, and select **Resume**.
Delete a rule set or a group	Right-click the rule set or group, and select **Delete**. **Note:** You cannot delete an enabled rule set.
View the description of a rule set	Right-click the rule set, and select **Get Info**.
