Fixed bugs in Prinergy Workflow 9.5

PRINERGY-52918	Workshop "Configure Imposition Applications" - Cannot select applications [Mac_12.1/M1]
PRINERGY-52824	Workshop always crashes on Mac 12.x
PRINERGY-52767	PreflightPlusProfiles share does not auto-mount on Mac client when user logs in with domain account
PRINERGY-52711	APPE: Change the Rips temp file location to anything other than C:\Temp
PRINERGY-52709	File with Prinergy Tools Object Screening applied to Text fails to Refine.
PRINERGY-52637	LPV: Proof Status warning icon incorrect when outputting all versions
PRINERGY-52560	Transparent vector object over Axial Blend wrongly converts to CMYKOGV instead of CMYK
PRINERGY-52495	Primary server does not automatically sync up with the secondary server if it crashes and automatically restarts
PRINERGY-52397	The callout for the Print Curve is incorrect when the SCO press device has multiple output versions, always using the Default version
PRINERGY-52379	LPV: Columns in the Version Pages tab should be sortable
PRINERGY-52339	LPV: accent character with multiple encodings goes missing after Generate with Freetype
PRINERGY-52293	Prinergy Workshop Visible Column shifts randomly after performing some actions
PRINERGY-52265	Workshop installer should not install Digital Direct and Digital Submit on Catalina and Big Sur
PRINERGY-52174	Message type for specific Marks JTP message can be set to Info, Warning or Error
PRINERGY-52165	Flattener: Black only Shading object tagged with Reader 9 profile separates as CMY when ColorMatched - Decalibrate is not stripping profile
PRINERGY-51908	MacOS: Cannot launch Callas pdfToolbox and access Preflight+ Profiles - UNIX Permissions issue
PRINERGY-51406	Tasks are not evenly distributed across JTPs

PRINERGY-51058	LPV: The Preflight Report visible column is not being set to Generated when all component pages have been run through Preflight+
PRINERGY-49996	Knock-outs lost when single separation output to composite vector PDF
PRINERGY-49679	CIP3 (PrintLink) output for TIFF-Direct is incorrectly mirrored and rotated.
PRINERGY-49621	Pattern that is Tiling Type 3 shifts on Vector Output
PRINERGY-49619	Copy job not keeping page alias assigned to pageset
PRINERGY-49342	Prinergy should not translate Document or XMP Screen angles into PostScript angles
PRINERGY-46986	Dot Size settings for Staccato NX in Output PTs should be grayed out if a resolution other than 2400 dpi is entered for Resolution X/Y under Render.
PRINERGY-45808	Separated PDF Vector: Spot object set to Do Not Output changes to Null and ruins appearance of output
PRINERGY-45739	Vector Output: Separation set to Do Not Output shows in Acrobat Output Preview
PRINERGY-44776	Output of multiple signatures fails if ColorFlow Job Color Setup set to None
PRINERGY-42082	RBA: Set Page approval actions do not work for LPV Version Pages
PRINERGY-38562	Color bar objects incorrectly painted with White spot when only Die separation is output to Vector PDF
PRINERGY-38176	Preflight+: Reports being copied to a location even though the option is off
PRINERGY-37138	Imposed vector output with some CMYK or spot set to Do Not Output causes 0% CMYK white knockout fill to disappear.
PRINERGY-28128	Workshop becomes unresponsive when 1000pg file is refined and ColorFlow is enabled
PRINERGY-26700	Re-refine of file with new spot colors results in new spots being set to "Convert to process"
