Available Patches - Prinergy Workflow 9.5

Prinergy 9.0 introduced bug fix deployment through the Prinergy Patcher tool. Please contact the Kodak CEC if you are interested in applying any of the patches listed below.

- Patches for the same Prinergy version should be installed sequentially
- Patches should be installed on all Prinergy Primary and Secondary servers.
- The latest installed patch version will be displayed within Prinergy Administrator > Help > About Prinergy Administrator
- Patches can be uninstalled

Patch Number	Referenced PR ID(s)	Description
P9.5.0.1	PRINERGY-53034	Rehost tool: rehosting/renaming a server by adding some text to the original host name will result in some process templates and JTP's not properly being renamed
P9.5.0.2	PRINERGY-53031	PDF Vector: Imposed out PDF fails with 'Wrong operand type' when opened in Acrobat
P9.5.0.3	PRINERGY-53055	Rehost tool is leaving the BLW2K19 share in Prinergy Administrator
P9.5.0.4	PRINERGY-42887	No longer compress nightly database backups. This will save time and disk space
P9.5.0.5	PRINERGY-53132	ColorFlow CopyDot calibration curves not applied properly to spot colors
P9.5.0.6	PRINERGY-53026	Editing the Placement when output with Cut sheet will cause the Ink eater mark to shift
P9.5.0.7	PRINERGY-53140 PRINERGY-38020	Colormatcher: Spot color Smooth shade disappears when mapped to Magenta AND Implement Adobe JPEG Decoder. This fixes an issue where small pixel artifacts were appearing after decompressing some JPEG images
P9.5.0.8	PRINERGY-53160	Rehost tool is not migrating new Output Intent settings properly
P9.5.0.9	PRINERGY-53162	Export job fails when job contains double-byte characters in the page labels column

P9.5.0.10	PRINERGY-53120	Copy Job fails if page sets contain both aliases and local pages
P9.5.0.11	PRINERGY-53117	Error and Warning icons incorrect in several processing dialogues, visible columns and not matching job history
P9.5.0.12	PRINERGY-52568	HyperFlex screening output with Extended Printer JTP creates artifacts if Set Halftone Phase and Scaling are enabled IMPORTANT NOTE: DotShop output with Prinergy Patch 9.5.0.12 extended proof JTP **will not** honor DotShop Curve settings. Workarounds: use legacy Output JTP with DotShop, or specify calibration curves using the Output Process Template (PRINERGY-53281). **Install Patch 9.5.0.15 to fix this**
P9.5.0.13	PRINERGY-53117; ECM-13999; ECM-13844	LPV Generate or Refine of many pages cases, Error and Warning icons incorrect in several processing dialogues, visible columns and not matching job history
P9.5.0.14	PRINERGY-53154	Imposition color mapping to "alias" separation gets reset if original page is re-refined NOTE: You must also install the W9.5.0.3 Workshop Patch
P9.5.0.15	PRINERGY-53281	Prinergy with P9.5.0.12 patch will not honour Dotshop curve setting when using Extended Proof JTP
P9.5.0.16	PRINERGY-53270	Output fails with failed to read document XMP tags error
P9.5.0.17	PRINERGY-53222	Bundle of fixes for Ricoh DFE
P9.5.0.18	PRINERGY-48079	Certain PDFs increase excessively in file size after refine (**Warning:** This patch causes an artifact when font Benzin-Bold is colormatched in certain PDF (PRINERGY-53531)) **Patch P9.5.0.21 fixes this issue**
P9.5.0.19	PRINERGY-53057 PRINERGY-53422	Subpage gets deleted when Preflight+ is on and JTP crashes or task is cancelled (**Warning:** This patch also contains Patch 18 so installing it, is also subject to PRINERGY-53531) **Patch P9.5.0.21 fixes this issue**

P9.5.0.20	PRINERGY-53134 PRINERGY-53030	Fix for large 10,000 page PDF crashing normalizer and RBA rule stalling when Import fails (**Warning:** This patch also contains Patch 18 so installing it, is also subject to *PRINERGY*-53531). **Patch P9.5.0.21 fixes this issue**
P9.5.0.21	PRINERGY -53531	Fixes artifact issue when certain PDF is colormatched caused by Patch 9.5.0.18
P9.5.0.22	PRINERGY-53604	Patch 20 installed CTLWOutput, PreflightPlusJTP, PrinterExJTP and PrinterJTP in the wrong location
P9.5.0.23	PRINERGY-53586	Job Ticket Creator crashes when using the Rip to Render in Insite to view LPV pages with blank versions
P9.5.0.24	PRINERGY-53585	Workshop users that are part of Domain or Workgroup Groups intermittently cannot log into Workshop
P9.5.0.25	PRINERGY-53642	Unable to edit Pandora Layouts when Prinergy Patch 9.5.0.20 is installed
P9.5.0.26	PRINERGY-53621	KPS Proofer output fails with Broadcast error when Patch 9.5.0.20 is installed.
P9.5.0.27	PRINERGY-53642	Unable to edit additional Pandora Layouts when Prinergy Patch 9.5.0.20 is installed
W9.5.0.1	PRINERGY-53051; PRINERGY-53056	Signature Custom Fields change order when jobs closed and opened AND AraxiHome share is being auto-mounted when you launch Workshop. Because this is a Workshop patch, it doesn't use the Prinergy Patcher and must be installed manually
W9.5.0.2	PRINERGY-53118	Version Pages are sorted into a nonsensical order and resorting is not retained NOTE: This Workshop Patch also contains the fixes from W9.5.0.1
W9.5.0.3	PRINERGY-53154	Imposition color mapping to "alias" separation gets reset if original page is re-refined You must also install P9.5.0.14 for this fix
INST-13690	INST-13690	Fixes an issue where Smart Review fails when using the Rip for Rendering. This is available on Partner Place article 75729.
