Using the Preps Migration Utility - 64 bit version coming soon

Use this utility when you have a new installation of Preps on your computer, such as Preps 9, and you would like to migrate your settings from Preps 6 or earlier to this new version. You can run the utility at any time.

1. Shut down any instances of Preps running on your computer.
2. Start the Preps Migration Utility from the `Preps 9\Utilities\Preps Migration Utility` folder.
3. In the **Source Preps Location** area, browse to the previously installed copy of `Preps.exe` or the Preps application file.
4. In the **Destination Preps Location** area, browse to the newly installed `Preps.exe` or Preps application file.
5. Perform one of the following actions:
   - Click **Add All** to migrate all settings.
   - Select certain settings only and click **Add** to migrate them.
6. Click **Migrate**.

Manual Migration Steps

We are developing the Preps Migration Utility tool for 64 bit operating systems. In the interim, please visit Manually migrating from an earlier version of Preps v9.0.
