VPS+ User Interface

VPS+ User Interface Menu items and Toolbar Icons change, depending on which Mode you are using.

See **Commercial Mode vs Packaging Mode**

- **Menu** items (dependent on Mode)
- **Toolbar Icons** (dependent on Mode)
- **Workspace**: Large blank area when no file is currently open
- **Display Windows:** Appears within the workspace when you open a TIFF file or layout, and has the following components:
  - Title bar with the name of the displayed file or Imposition name and specifications (dependent on Mode)
  - TIFF image or layout with related elements
  - Status bar with information about the displayed file
- **Information Panels** on the right side of the workspace:
  - **Navigator**: Displays a thumbnail image of everything in the currently active display window
  - **Inventory**: Provides information about files, separations, masks, and marks (depends on Mode)
  - **Info**: Provides information about selected elements in a layout (depends on Mode)
