Changing the active version

You can install a number of different versions of Prinergy Evo software on your server computer, and test one version before fully activating it, or easily change to and activate a different software version.

> ⚠ Data is not migrated when switching between installed versions.
> After changing the active version, you must connect to, reinstall, and start the Prinergy Evo Client software. See the *Prinergy Evo Installation Guide* for more information.

1. Stop the Prinergy Evo Client software
2. Stop the Prinergy Evo Server software. For more information, see Stopping Prinergy Evo server software.
3. From the Prinergy Evo Server desktop, select **Start** > **Prinergy Evo** > **Prinergy Evo Setup**.
4. In the Welcome to Prinergy Evo Setup InstallShield wizard, select the **Activate another version** option.
5. Click **Next**.
6. Follow the remaining instructions in the Prinergy Evo InstallShield wizard to change your active version.
7. Click **Next** to move to the next dialog box.
8. Click **Finish** at the end to activate the changes.
9. Start the Prinergy Evo Server software. For more information, see Starting Prinergy Evo server software.
10. Connect to, install, and start the Prinergy Evo Client software.
