

# Requirements

Confirm that the workstation on which you are installing the Preps software meets these system requirements:

|                                    |                                                                                                                                                                                                                                                                                                                                                                                                                  |
|------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| <b>Qualified Anti-Virus</b>        | McAfee                                                                                                                                                                                                                                                                                                                                                                                                           |

## Notes:

**\*Preps 9.0.0 in Prinerger 9 currently does not support Mac OS 11 (Big Sur). As of Preps 9.0.2, Mac OS 11 (Big Sur) is qualified.**

**\*\*The M1 processor has been tested on OS 11 and 12.0.1 for Preps 9.0.3.**

**OS 12.1 has not been fully tested at this time.**

We recommend deploying any OS 12 Intel and M1 Macs with caution. Consider first creating a dual boot environment or Time Machine backup.

Allow some time to ensure all software works well in your specific environment, before rolling out on a larger scale.

Please also see the Prinerger, ColorFlow, VPS+, Pandora and PLA Release notes for supported client workstations and known limitations.
