Integration with other Kodak software

Integration with other Kodak software for Prinergy Evo Workflow 8.2

ColorFlow

Prinergy Evo Workflow 8.2 includes the Kodak ColorFlow 8.0 software Workflow edition. If you want to install the ColorFlow Client on the Prinergy Evo Workflow server, ensure you first download Microsoft .NET Framework 3.5 . The minimum Oracle Java version required for the ColorFlow server is 1.6.0.33. For information on new features and the latest fixes included in the ColorFlow software, see the *ColorFlow 8.0 Release Notes*.

Preps

Prinergy Evo Workflow 8.2 includes the Kodak Preps 8.1 software. Prinergy Evo Workflow 8.1 also supports Preps 6.3 (Plus or Pro) up to Preps 8.2 for generating imposition plans (PJTF or JDF format) that are imported manually into Prinergy Evo Workflow. For information on new features and the latest fixes included in the Preps software, see the *Preps 8.2 Release Notes.*

Pandora

Prinergy Evo Workflow 8.2 supports Pandora 8.0 and 7.x for generating layout plans (PJTF or JDF format).

InSite

Kodak no longer supports connectivity between Evo and Kodak InSite. Please contact your sales representative to learn about our attractive offers for upgrades to Prinergy Workflow.
