

Setting Ink inspection parameters

- 1. In the Parameter Configuration interface, select **Ink**.
- 2. To set ink parameters and confirm that you want the file inspected for those parameters, select the **Enable** check box.
If **Enable** is not selected, the ink parameters will not be inspected.

- 3. Set the parameters you want to use for the ink check:

Max Number of Allowed Spot Colors	The maximum number of spot colors allowed in the job
Max Number of Allowed Inks	The maximum number of inks allowed in the job
Warn on RGB Inks Usage	When selected, the system will warn the user when RGB colors are used.
