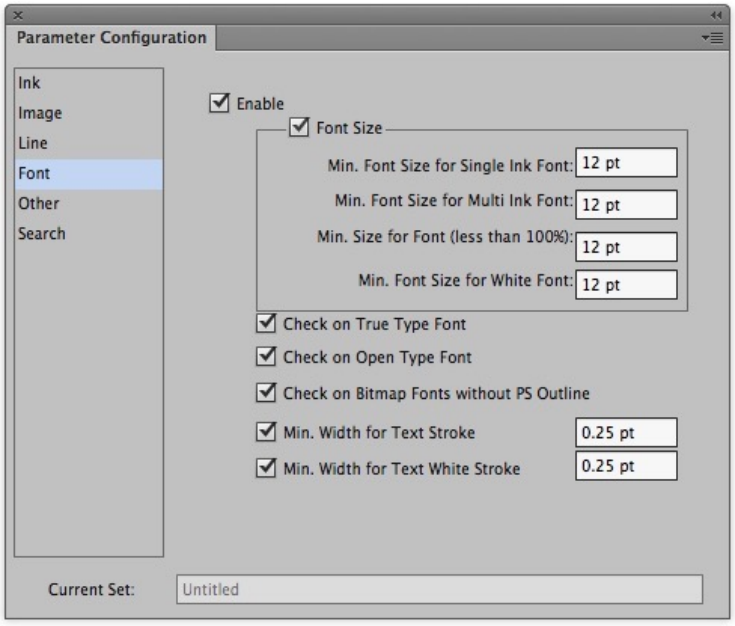
Setting Font parameters

1. In the Parameter Configuration interface, select **Font**.
2. To set font parameters and confirm that you want the file inspected for those parameters, select the **Enable** check box.
   If **Enable** is not selected, the font parameters will not be inspected.



Font Size	Check for fonts in objects that are less than the specified minimum font size for Single Ink Font, Multi Ink Font, fonts with specified inks that are less than 100%, and White Font (fonts without filling with any color).
Check on True Type Font	Check for True Type fonts in the job.
Check on Open Type Font	Check for Open Type fonts in the job.
Check on Bitmap Fonts without PS Outline	Check for Bitmap fonts without PostScript outlines in the job.
Min. Width for Text Stroke	Check for fonts with strokes less than minimum line width of the job. The unit of measurement for line width should match the unit selected in the Adobe Illustrator Preferences.

Min. Width for Text White Stroke	Check for fonts with white strokes less than minimum line width of the job. The unit of measurement for line width should match the unit selected in the Adobe Illustrator Preferences.
