

Prinergy Direct Marquee Tool

The Prinergy Direct Marquee Tool allows users to marquee select objects within a group. The sub-objects are selected only if the Marquee select box is created around the entire sub-object.

Point Selection

1. Deselect the **Object Selection by Path Only** option from the Adobe Illustrator Preference window.
2. Using the Selection Tool, single-click any point of the object path to select an object. If the object is an Object Grouping or composite path, the object will also be successfully selected.
3. Select the **Object Selection by Path Only** option from the Adobe Illustrator Preference window.
4. Single-click the path or the anchor point to select the object. If the object is an Object Grouping or composite path, the object will also be successfully selected.
5. To add or release the object, hold down the Shift key and click the object you want to add or release.
