Apply In All Directions						

- 3. Set the parameters:
  - Width: Select the letter you want to work with, and then type a positive value to expand the letter or a negative value to compress the letter.
  - **Angle**: Set the direction of expansion or compression. **Note**: The angle setting works only on outlined letters. It cannot work on letters with font properties.
  - **Corner**: Select one of the three corner styles.
  - Miter Limit: When the Miter corner is selected, set the limit.
  - **Copy**: To create a new expanded letter on top of the initial letter, click this button.
  - **Apply**: Click to apply the settings to the selected letter.
  - **Expand All Direction**: If you select this check box, the selected letter will expand /compress in all directions. If the check box is cleared, the letter expands /compresses in the horizontal direction according to the **Angle** setting.
