Setting up automatic system backup

Note: InSite Creative Workflow 9.2 does not integrate with the Prinergy Configuration Backup in Prinergy. The InSite Creative Workflow standalone backup system will function properly independently of the Prinergy Backup.

Set up InSite Creative Workflow Online Backup to start automatically when the Oracle database backup finishes.

1. On the InSite Creative Workflow server, open the `<systemdrive>:\Oracle\19.0.0 \Creo\Util` folder.
2. In a text editor, open the `SuccessfulBackup.cmd` file.
3. Edit the file to remove REM from the beginning of the following line:
   `%AraxiHome%\TWAMInstall\...StartAraxiBackup.cmd`
   This line tells Online Backup to start after a successful Oracle backup is completed.
4. Save and close the file.
5. In a text editor, open the `UnSuccessfulBackup.cmd` file.
6. If you want Online Backup to start even if the Oracle backup is not successful, edit the file to remove REM from the beginning of the following line:
   `%AraxiHome%\TWAMInstall\...StartAraxiBackup.cmd`
   If you want Online Backup to start only when the Oracle backup is successful, do not modify the file.
7. Save and close the file.
