Setting up a third-party proofing device

Set up a non-Kodak proofing device to work with the Prinergy system.

Kodak Prinergy's supported workflows in order of preference:

- Prinergy -> **direct connect** -> **KPS** -> **specific supported Epson SureColor P-series inkjet proofers**.
- Prinergy -> **PDF or TIFF** -> **network shared folders on a third-party color RIP server** -> printer
- Prinergy -> **PS3 or EPS Raster** -> **Windows PS print driver** -> **PS compatible printer**.

- Supported third-party proofing devices
- Determining if a third-party proofing device can be used with Prinergy
- Configure output to a third-party Color RIP server
- Configure output to a third-party PostScript compatible Printer
