Available Patches - Prinergy Workflow 9.0

Prinergy 9.0 introduces bug fix deployment through the Prinergy Patcher tool. Please contact the Kodak CEC if you are interested in applying any of the patches listed below.

- Patches for the same Prinergy version should be installed sequentially
- Patches should be installed on all Prinergy Secondaries
- The latest installed patch version will be displayed within Prinergy Administrator > Help > About Prinergy Administrator
- Patches can be uninstalled

Patch Number	Referenced PR ID(s)	Description
P9.0.0.1	PRINERGY-52313	Ink Eater mark shows through artwork content
P9.0.0.2	PRINERGY-52257	Active Directory Support in Prinergy and UADM UI - see limitations within Known bugs and limitations in Prinergy Workflow 9.0
P9.0.0.3	PRINERGY-52304	Tiff Direct output fails when making on-the-fly Process Template edits
P9.0.0.4	PRINERGY-52463	Adding input files or re-refining pages hangs after importing impositions into a job (required)
P9.0.0.5	PRINERGY-52387	PrinterEx JTP and JDF Print Processor hang indefinitely under heavy load and frequent task cancellations
P9.0.0.6	PRINERGY-52507 and INST-13473	This is the Prinergy server side components for INST-13472. In IPP 9.2.x, all of the comment fields were truncated to 128 characters. This patch increases the size of the Request Approval comment only.
