## Job Manager window

## Main pane

Pages view (with Page Sets, Pages , and Input Files panes)
Signatures view (with Imposition Plans, Pages , and Input Files panes)
Separations view
Storage view
History view

The **Job** button enables you to treat the whole job as if it were an element. You can start certain processes (archiving, purging, retrieving, and exporting) for the whole job without selecting the job files individually, and without exiting Job Manager. You can also locate the Jobs folder in the file browser, and get job information by opening the folder named after the job.

Right-click the **Job** button to display the available menu items.
