- Create layouts, templates, and jobs
- Create a ganged layout
- Work in the Assembly view
- Work with JDF files
- Create and use AutoGang presets
- Use AutoGang with hot folders
- Create advanced layouts
- Set up mark rules

Other learning and support resources

If you need more information or you are looking for other resources on Preps, you can:

- Use the online help and demonstrations provided with Preps imposition software
- Complete the activities provided with the Preps demonstrations
- Log on to the Partner Place portal to look for additional documentation, demos, downloads, and troubleshooting answers.
  Partner Place also includes a catalog of self-training resources, including video demonstrations and activity files that can be downloaded for use with the activities in the Preps Activity Guide. Please see the Catalog of self-paced KODAK UWS training resources for more information.
