

Hardware and software requirements

Before you install this version of the Matchprint Virtual software, ensure that your system meets the following minimum requirements.

Supported Kodak workflow software

Matchprint Virtual 9.2 supports the following versions of Kodak software:

- Kodak InSite Prepress Portal 9.x
- Kodak PressProof 9.x
- Kodak InSite Creative Workflow 9.x

Operating systems and browsers

The Matchprint Virtual software requires one of the following versions of the Apple Mac OS X operating system software:

Important: Only Apple's Safari browser can be used for color accurate monitor softproofing.

- macOS High Sierra (10.13)
- macOS Mojave (10.14)
- macOS Catalina (10.15)
- macOS Big Sur (11)

Platform

- Apple Mac Pro computer
- Apple Mac mini computer

Notes:

- Mac computer with the M1 chipset is not supported at this time.
- The Mac computer must have the correct video cards, available ports, and cables to support the recommended (maximum) resolution of the monitor or multiple monitors (if using PressProof).
- Monitors from the recommended vendors require both a video display cable and a USB data cable.
- iMac computers do not maintain constant temperatures required for color matching and therefore are not supported.

For information about video cards, see the Apple Web site at <http://www.apple.com> or contact your Apple dealer.
