

# Matchprint Virtual—Measuring devices

You can use one of the following measuring devices for calibrating your monitor with Matchprint Virtual:

- X-Rite i1 Pro Rev D (unfiltered and UV-cut filtered instruments are supported)
- X-Rite i1 Pro2 (unfiltered and UV-cut filtered instruments are supported).
- X-Rite i1Basic Pro2 (unfiltered and UV-cut filtered instruments are supported)
- X-Rite i1 Display 3\*
- X-Rite i1Basic Pro3 (unfiltered and UV-cut filtered instruments are supported)

**\*Important:** The retail version will not work for this model. Only the OEM i1 Display 3 model is supported and available for purchase from X-Rite at <https://www.xrite.com/cart.aspx?AddItem=i1D3DC%2BOEM>.

**Note:** Should the cart not allow for checkout, contact [ordersoem@xrite.com](mailto:ordersoem@xrite.com) to complete the purchase.

This device is not supported for use with UHD (Ultra-High-Definition) monitors and is only recommended for use with new monitors.

**Note:** Active USB Extension/Repeater cables are not supported for use with the qualified measuring devices.

For Asia Pacific Region (APR) customers only: To purchase the iOneD3 from X-Rite, contact Elizabeth Eidson at <mailto:ordersoem@xrite.com>.

For EAMER customers only:
