

InSite Gateway 2.0.4 new features

New features and enhancements

This section lists features and enhancements that were added in this release.

Pages can be uploaded into both Pre-Production and Production jobs

You can now view both Pre-Production and Production jobs through InSite Gateway. If uploading to Production jobs is enabled, then you can upload pages as well.

Note: Pages that are approved cannot be overwritten in a Production job.

Single-Page PDF output

InSite Gateway can now send single-page PDFs from a multi-page **.indd** file, or a multi-artboard **.ai** file. Page ranges are supported.

Ability to change export filename during single-page PDF output

InSite Gateway can now change the name of exported PDFs from a multi-page **.indd** file, or a multi-artboard **.ai** file.

Section and Numbering support

InSite Gateway now honours changes made to **Numbering & Section Options** in InDesign when sending single-page PDF output. The Section headers and page numbering are reflected in the output PDF name.

Upload failure warning

Files that fail during upload will show in the InSite Gateway extension window.

Jobs are now sorted in alphabetical order

Jobs are now sorted in alphabetical order for easier location in InSite Gateway extension.
