VPS+ 10.0 Release Notes

New Features

VPSPLUS-364	Keyboard shortcuts to switch original and compared files in Compare Mode and to toggle Compare On and Off
VPSPLUS-367	Open all viewing windows in exactly the same position, as in VPS Classic.
VPSPLUS-368	Open all viewing windows with exactly the same size window, as in VPS Classic
VPSPLUS-369	Keyboard shortcut to toggle between open files. (This enables the VPS Classic ability to toggle between separations to compare differences.)
VPSPLUS-392	Compatibility with MacOS 13 Venture

Bug Fixes

VPSPLUS-313	Cannot quit application after switching applications on Mac OS, must use Force Quit.
VPSPLUS-365	VPS+ should match spot color names in Color DB when no CMYK values in file.
VPSPLUS-366	Issues in Separation Handling when adding and deleting spot colors in Packaging Mode.
VPSPLUS-371	Standalone VPS+ installer should install the application in the same location as Prinergy Workshop installer.
VPSPLUS-374	Front and back alignment problem with certain Work and Tumble forms.
VPSPLUS-376	VPS+ crashes when opening certain TIFF files.
VPSPLUS-386	Tooltips for Angle/Tint/Ruling on Separations panel are incorrect.
VPSPLUS-388	Outputting a layout with rotation fails (Mac only)
VPSPLUS-393	Zoom ratio list, Version list and Separation check boxes don't work well for LPV files.
VPSPLUS-394	The Preview window is empty when a Combined/ Descreened TIFF file is opened.

VPSPLUS-395	Switching to PDF geometry design mode crashes if you select *Close the Preview Window* in preferences.
VPSPLUS-396	The image in PDF geometry design window is incorrect if "Extra Area" is set in Preferences.
VPSPLUS-400	Some Japanese translations in Packaging Mode are wrong and need to be corrected

List of all new and existing Keyboard Shortcuts

Keyboard Shortcuts

VPS+ 10.0 Limitations

PDF export when in Packaging **PDF Design Mode** does not work in macOS 13 and macOS 14. (VPSPLUS-402)

No Ink Coverage Comparison feature as in VPS Classic.

Cannot preview two-sided layouts in Packaging Mode. Flexo packaging layouts are typically created from TIFFs files, and TIFFs do not contain the DIG comments required to recognize imposition information. If you wish to check backups on packaging layouts, you will have to switch to Commercial Mode.

Long color names are cut off in the Separations panel, which can make it difficult to identify PANTONE colors. **Workaround**: hold the mouse pointer over the color separation name to get a Tool Tip pop-up of the full color name.

Navigator and Inventory/Separations panels are fixed to the right side of the VPS+ display window and cannot be resized, so panels cannot be enlarged to view long color names and the maximum Zoom to Fit size of layouts is constrained.
