

Committing all adjustments

You can commit all color adjustments after [capturing a snapshot](#).

Note: You can't undo adjustments after the commitment. However, if you revert to the snapshot prior to Commit Adjustments in History, you can then undo an adjustment.

1. From the **Edit** menu, select **Commit All Adjustments**.
A dialog box appears say *"This will disable Undo of all previous adjustments. Continue?"*
2. Click **OK**.
3. If you have not captured a snapshot, a warning dialog appears saying *"Commit all adjustments can be performed only after a snapshot capture. ColorFlow software will capture a snapshot now. Continue?"*
4. Click **OK**.
