# Term comparison between Harmony and ColorFlow

The following table lists terms used in Harmony and ColorFlow:

| Harmony term | ColorFlow term |
|---|---|
| Plate current curve | Measured plate response |
| Plate target curve | None (desired plate response is always linear) |
| Paper current curve | Output device condition tonal response |
| Paper target curve | Target device condition tonal response |
| Transfer curve | Print transfer curve |
| Derived paper calibration curve | Print calibration curve |
| Derived plate calibration curve | Plate calibration curve |
