

# **\_evaluate a device profile**

Do the following:

- To evaluate a source (A2B) tag of the profile:
  1. Select **Evaluation Mode: Source**.
  2. Select the **Rendering Intent** you wish to evaluate.
  3. In the **Input Tints** panel, select the **Tint Value Range** of input tint values you wish to evaluate.
  4. Double-click in the first cell of the **Input Tints** table.
  5. Type a Cyan input tint value.
  6. <tab> to advance and enter a Magenta input tint value.
  7. Repeat for other ink input tint values.
  8. Repeat to enter another set of input tint values.
  9. Terminate input tint entry with <enter>.
  10. In the **Output Colors** panel, enter the desired **Color Precision** of evaluated output color values.
  11. Click **Evaluate** below the **Input Tints** table.
- To evaluate a destination (B2A) tag of the profile:
  1. Select **Evaluation Mode: Destination**.
  2. Select the **Rendering Intent** you wish to evaluate.
  3. Double-click in the first cell of the **Input Colors** table.
  4. Type an L\* input color value.
  5. <tab> to advance and enter an a\* input color value.
  6. <tab> to advance and enter an b\* input color value.
  7. Repeat to enter another set of L\*, a\*, b\* color values.
  8. Terminate input color entry with <enter>.
  9. In the **Output Tints** panel:
    - select the desired **Tint Value Range** of evaluated output tint values.
    - enter the desired **Tint Precision** of evaluated output tint values.
  10. Click **Evaluate** below the **Input Colors** table.
- To copy, paste and evaluate multiple input tints or colors:
  1. Select an array of input values in a spreadsheet or tab-delimited text file.
  2. Copy.
  3. Click in the ColorFlow Evaluate **Input Tints** or **Input Colors** table.
  4. Select all.
  5. Paste.
  6. Click **Evaluate**.
- To copy output colors or tints for use by another application:
  1. Click in the **Output Colors** or **Output Tints** table.
  2. Select all.
  3. Copy.
- To combine the above two operations:
  1. Select an array of input values in a spreadsheet or tab-delimited text file.
  2. Copy.
  3. In ColorFlow Evaluate, click **Paste - Evaluate - Copy**.
