Devices

A device is a representation of a physical device or a reference device in your printing environment.

Physical devices include curve-controlled devices and non-curve-controlled devices. A curve-controlled device uses curve to control color. A non-curve-controlled device uses device profile to control color.

The following table lists all the curve-controlled devices and non-curve-controlled devices in ColorFlow:

Curve-controlled devices	Non-curve-controlled devices
- Offset Press – Sheetfed - Offset Press – Heatset Web - Offset Press – Coldset Web - Flexographic Press - Digital Halftone Proofer – Approval - Digital Halftone Proofer – Spectrum - Digital Halftone Proofer – Other - Digital Press – Versamark - Digital Press – Prosper	- Digital Press – NexPress - Digital Press – Other - Inkjet Proofer – Matchprint Inkjet - Inkjet Proofer – Veris - Inkjet Proofer – Other
