

Promoting a pooled device in a device condition

You can select a device to be the promoted device in a pooled device condition after the device is characterized.

1. In a device condition in the viewer window, click the **Measurements** icon  next to a device.
2. In the **Measurements** dialog box, click the **Measurements** tab.
3. In the **Active Measurement** area, select a measurement set.
4. Click **Promote Device**.

The color response of the device you promoted is now the color response of the device condition. Any affected color control elements are automatically recalculated.
