- Replace Windows graph API with Microsoft graph API for azure resource management.

Cloud Service Tool (1.0.4):

- Replace Windows graph API with Microsoft graph API for azure resource management.

Prinerger Access 1.0.12 (Beta Release)

Software requirements

- Prinerger Access is compatible with the latest version of Chrome, Firefox, Edge, Safari as below:

New Features

Category	Description	PR
Prinerger Portal	Color Library Import from Device Profile.	AP-1496
	Update default Preflight profiles to Callas v13 compatibility.	MTE-877
Prinerger Access	Update Smart Review in Prinerger Access to accept Callas v13 XML reports.	MTE-551
Cloud Color Flow	Get Device Profile Colorant transactions	CC-328
	Get Display Color And Density transactions	CC-329
KCCP	Task Cancel Command	CI-3182
	Update KCCP Callas Preflight to v13	CI-3495
	Trap process traps colorants with definition absent from parameter file	CI-3645

	Trap process supports timeout	CI-3647
	Pods are assigned to a customer - simplified queuing/licensing	CI-3655
	UCore module: consistent interface for progress, cancel, messages	CI-3660
	Processors implement cancel during console app execution	CI-3664
	Processors implement cancel during console app execution	CI-3664
	Processors implement concurrent processing and upload for multi-file output	CI-3667
	Contone page render (and thumbnail) processors report step progress	CI-3668
	UCore module has better rate limiting for progress reporting	CI-3670
	Task aggregate progress calculation improvements	CI-3671
	Diagnostic messages (errors only) appear in the task aggregate	CI-3672
	Analyzer assigns every Nth page to each of N steps	CI-3675
	The API microservice validation of POST task request body	CI-3678

Bug Fixes

PR	Description
CI-3596	Failed Task does not update state from processing
CI-3674	Contone page render fails for certain files.
CI-3677	Analyzer never finishes if account or container is empty.
CI-3689	Convert PDF failed for certain file.

CI-3651	Contone page renderBox not honored correctly
MTE-873	Preflight Fixup fails in Upload Processing with <i>"Preflight profile is invalid"</i>
MTE-905	Access processing does not correctly assign page geometry when bleed is created with a Preflight fixup
MTE-923	Trap fails if page color not found in any selected libraries
MTE-941	Start Process: edited color mapping settings are ignored if the process is started directly.
MTE-953	Smart Review occasionally doesn't start up correctly.
CC-353	Validate that Device Profile transactions accept other ICC profiles as device profiles
