

Workflow Pipelines

Files submitted to PRINERGY Access are processed by Workflow Pipelines. You can configure Workflow Pipelines to do any of the following processes:

Pipeline Process	Function
Preflight	Have your files Preflighted with available Preflight Profiles for instant verification of file compatibility.
PDF Conversion	Have your files converted to print-ready settings including applying color profiles.
Submission to a Device or Directory	Have your files submitted to a network location such as a hot folder.

See [Configuring Workflow Pipelines](#) for more information.
