

# PDF Creation

The **PDF Creation** dashboard displays the total number of PDFs created in a given time period, and how many original PDFs have been replaced.

**Created Total** represents the number of original pages that were created.

If an original page is refined again with the same Process Template, or Refined with a different Process Template, the **Replaced Total** number will be incremented, but **Created Total** will remain unchanged.

On the **PDF** Dashboard, you can view the following reports and chart:

Number	Name of report /chart	Description
--------	-----------------------	-------------

1	<b>PDF Creation</b>	<p>Provides information about the number of pages that were refined and the number of pages that were replaced in a specific period of time.</p> <p><b>Note:</b> Click the title of a subsection (<b>Created</b>, <b>Replaced</b>) to switch between them.</p> <p><b>Note:</b> When filtering by week, month, or year, the report will display data from the first day of that period. For example, if you select <b>Year</b>, the displayed data is from Jan/01/2017.</p>
2	<b>PDF Creation Distribution</b>	<p>Displays the volume of the pages that were refined in a specific hour, relative to other times in the same day of the week. The darker areas indicate a larger number of refined pages.</p>
