

Separations Dashboard

In this discussion we will explore the Separations dashboard.

Most Used Templates

Template Name	Template Group	Separations
TIFF_2400dpi_WebG	ECMs	68
Tiffs_Output	Paul	28
VPS_175lpi_2400dpi	JR_FINAL_PT	21
AutoFlatOutput	Auto Flat Output	20

Separations by Template Group

Template Group	Separations
ECMs	109
JR_FINAL_PT	33
Paul	28
Auto Flat Output	24

In the **Separations** dashboard, you can view the following reports:

Number	Name of report /chart	Description
1	Output Separation by Date	Displays the number of separations that were created (usually this information is equivalent to the number of plates that were used).

2	Most Used Templates	Displays the 10 most used process templates in a descending order.
3	Separations by Template Group	<p>Displays the number of separations that were produced by a specific process template group.</p> <p>Note: You can drill down into the details of a template group by clicking its name. The report will show the number of separations that were produced by each template in a specific group.</p>
4	Separations Distribution	Displays the number of the separations that were produced in a specific hour, relative to other times in the same day of the week. The darker areas indicate that a larger number of separations were produced at that time.
