It is important to note that when analyzing results in your reports, you should be looking for repeating patterns in the data or excessive message counts that could indicate a re-occurring problem with customer supplied files and or problems with your Prinergy Workflow software.

NOTE: *It is important to note that not all warnings or error messages are indicative of a problem with your Prinergy Workflow software. Instead they are a record of the actions / events that were occurring in the software over a defined time period.*

If you need help in analyzing your Prinergy System History reports, the Kodak Professional Service Team is available to assist you. Please contact Kodak sales at xxx-xxxx for additional information.

Did you know?

- When you click on an item in the Filters pane, for example ARCH; all aspects of the dashboard will change to focus on that item.
