The Statistics by Job report displays the total elapsed time for one or more jobs in prepress production, along with the number of Prinergy system actions that have been performed to date. Elapsed Time is calculated by measuring the time taken from the first system action performed on a job, to the last system action performed on the same job in minutes. Please keep in mind the elapsed time can reflect day-to-day production delays such as waiting overnight for a customer to approve a file in Insite Prepress Portal.

Did you know?

- Your data is only as good as your Users! For the data to be effective, all your Users should have their OWN identity!!
- Clicking on the User name in the Chart, will FOCUS the Table below.
