Stopping a rule set

Stop a selected rule set while it is executing. This does not stop the processing of all rule sets.

- Stop a rule set in any of the following ways:
 - In the Process Template pane, right-click a rule set and select Stop All Processing.

The rule set stops executing, and it is disabled.

 Open Rule Set Manager. In the Enabled Rule Sets list, right-click a rule set, and select Stop All Processing.

The rule set stops executing, and it is disabled.

View the Executing Rules page, and click **Stop** next to the rule set.
The rule set stops executing, but it is still enabled.
