

# KPS 10.1 Release Notes

## New Features and Enhancements

MPI-570	When exporting profile, change wording "As profile without description" to "As signed profile"
MPI-576	Support macOS 14 (Sonoma)
MPI-582	For a new controller/VM - Add the ability to release the license from PLAS during license removal
MPI-585	Add ability to support JTF-1.3 from Prinergy direct connect (NPROOF)

## Problems Fixed

MPI-568	The automated step of saving the profile does not work after signing profiles
MPI-574	Default IDEAlliance M0 or NUV color bar is in RGB mode
MPI-565	Drying Setting is obsolete in KPS Media Configuration Edit Dialog
MPI-589	ICC Profile fails to import due to special characters in the Profile name
