

Installing CAD Correct

Obtaining the software files

The software files are available on a DVD and from Partner Place. To download the software files from Partner Place:

1. Log onto Partner Place at <https://partnerplace.kodak.com/>.
2. On the Partner Place home page, select **Service & Support > Prepress Software Downloads**.
3. In the **Search** box, type **Pandora 3.x downloads**, then click **Search**.
4. In the search results, click **Pandora 3.x downloads**.
5. On the Pandora 3.2 downloads page, find **CAD Correct, version 2.0**.
6. Click the link for the software file for your operating system, then follow the on-screen instructions to download the files.

Installing CAD Correct on Macintosh systems

To install CAD Correct on the Macintosh operating system:

1. In the **Applications** folder, add a folder named **CAD Correct**.
2. Extract the contents of the installer (*.zip) file.
3. In the installer folder, open the **Mac** folder, and copy all of the contents to the **CAD Correct** folder.
4. Drag the CAD Correct application to the Dock.

Installing CAD Correct on Windows systems

To install CAD Correct on the Windows operating system:

1. In the **Program Files** folder, add a folder named **Kodak** if one does not already exist.
Note: If another Kodak application is installed, a Kodak folder already exists.
2. In the **Kodak** folder, add a new folder named **CAD Correct**.
3. Extract the contents of the installer (*.zip) file.
4. Open the **Win** folder, and copy all of the contents to the **CAD Correct** folder.
5. Right-click the `CAD Correct.exe` file, drag it to your desktop, then select **Create shortcuts here**.
