

# Input file pane

The **Input file** pane shows general information about the open file. In this pane, you can perform the following functions:

<b>File</b>	Drag and drop a CF2 or EPS file onto the <b>File</b> box to open the file.
<b>Current Item</b>	Select the pattern/die to use for the edition. Select <b>All</b> to view the full file, including any changes made to the sheet size.
<b>Show Line Type</b>	Select the line types to be shown in color (instead of black) in the <b>Preview</b> pane.
<b>Sheet size</b>	View or change the size of the full sheet.
