

Adding film

You can add a film size to the **ShopMap** palette by typing information and selecting settings in the New Film dialog box. You can enter a name for the film, or let Pandora generate the name automatically, based on the dimensions.

1. If the **ShopMap** palette is not currently shown, select **Window > Show ShopMap Palette**.
2. Click **Equipment**.
3. Click the **Film** tab.
4. Click the **options** arrow on the **ShopMap** palette, and then select **New**.
5. If you want to use a specific name for the film, type it in the **Name** box.
6. In the **Units** box, select the units you want to use.
7. In the **Height** and **Width** boxes, type the dimensions of the film.
8. Click **Create**.
