

Editing layouts in integrated mode

Open a job layout that you have saved and closed to continue working with it.

1. In Job Manager, switch to the **Step and Repeats** view. In the **Layouts** pane, double-click a layout.
2. In the **Select a layout application** list, select **Pandora**.
3. (Optional) To change the process template that will be used to export the layout from Workshop into Pandora, click **Select** next to **Export Layout Using Process Template**, and then select a different process template.
4. (Optional) To change the process template that will be used to import the layout from the layout software into Workshop, click **Select** next to **Import Layout Using Process Template**, and then select a different process template.
5. In the **Import Type** list, select a type.
6. Click **OK**.
7. Make the necessary edits to your layout and save your job.
8. To send the edited layout back to the Prinergy Workflow software, exit the Pandora software.
