

Setting the appearance of the die number

The LBL_Die Station Number mark prints in Heidelberg Helvetica Bold typeface. The default size is 12 points and the default color is registration. You can select a different point size. If you have added artwork to the layout, you can select any color used in that artwork for the die number mark. You can also set the mark to overprint or knockout.

Mark	Font	Color
LBL_Die Station Number	4-24 pt Helvetica Bold; the default is 12	Any in job. The default is registration.
LBL_Die Station Number KO	4-24 pt Helvetica Bold; the default is 12	Registration
LBL_Die Station Number XL	4-72 pt Helvetica Bold; the default is 12	Any in job. The default is registration.

1. On the **job properties** > **Content** tab, select the LBL_Die Station Number mark.
2. Under **Attributes**, in the **Font** area, select a font **Name**, **Style**, or **Size** for the mark.
3. In the **Color** box, select a color for the mark.
4. The **Overprint** check box is clear (not selected) by default. Select the check box if you want the mark to overprint.

Note: Overprint is disabled for registration color.
