

Adding the PLA schema to Prinerger Workflow

Add the PLA schema to the Prinerger Workflow system, and associate it with the XSLT file.

1. In Rule Set Manager, select **Tools > RBA XML Schema Manager**.
2. Click **Add a Group**, type a name, click the parent group, and click **Add Group**.
3. In the **Groups** list, select the group that you just created.
4. Click **Add a Schema**, and type a name.
5. Set the **Schema File** box to the PLA schema (.xsd) file.
6. Set the **Schema Root Element** box to **Job**.
7. Set the **Transform File** box to the XSLT (.xsl) file that you created.
8. Click **Add Schema**.

The schema now appears in the **Schema Name** list in the **Rule Parameters Editor** for the **Read XML** action.
