

Adding the PLA schema to Prinergy RBA

Add the PLA schema to the Prinergy RBA system and associate it with the XSLT file.

1. In Rule Set Manager, select **Tools > RBA XML Schema Manager**.
2. (Optional) Click **Add a Group**, type a name, click the parent group, and click **Add Group**.
In the **Groups** list, select the group you just created.
3. Click **Add a Schema** and type a name.
4. Set the **Schema File** box to the PLA schema (XSD) file.
5. Set the **Schema Root Element** box to `Job`.
6. Set the **Transform File** box to the XSLT file that you created.
7. Click **Add Schema**.

The schema now appears in the Schema Name list in Rule Parameters Editor for the Read XML action.
