

# Smart lists

You can create and manage smart lists to automatically reflect the addition and deletion of layout tickets.

## Creating a smart list

1. In Layout Automation Manager, click **Create Smart**.
2. In the **List Name** box, type a name for your smart list.
3. Click **+** to add a **rule**. Click **-** to delete a rule.

## Editing a smart list

To edit a smart list, perform one of the following actions:

- Double-click the list to open the Add Smart List dialog box.
- Right-click the list to open the context menu, and click **Edit Smart List:<listname>**.

**Note:** You cannot drag layouts into a smart list.

## Deleting a smart list

1. Right-click the smart list that you want to delete.
2. In the context menu, click **Delete Smart List:<listname>**.

**Note:** You are only deleting a view of the layout tickets. All layout tickets remain in the **All Layouts** list.

## Renaming a smart list

1. Right-click the list name and click **Rename List**.
2. Type the new name and click Enter.

## Smart list rules

To set up smart list rules, double-click the name of the list and select **+** to add new rules to it.

Field	Filter(s)	Options	Additional information
